

Greetings Supporter of the New Rosthern Hospital

Twin Rivers delegations have been involved in ongoing discussions with the provincial government and health ministry to keep them informed of the need for a new hospital in Rosthern. Our region's required portion of the project would be approximately \$7 million or 20% of the cost of construction. (Provincial government portion is 80%.)

The Rosthern Hospital's team includes 6 physicians who offer services to clinics in 3 surrounding communities serving a large region. The hospital has 24/7 emergency outpatient medical care which reduces the city hospitals' emergency department wait times. The current hospital has been identified as the northern anchor of the former Saskatoon Health Region. The facility is also an important teaching, mentoring and educational center for medical and nursing students.

A new hospital building is necessary to keep these essential services in the catchment area.

Rosthern Hospital Physicians
