Redbird is pleased with the response for our Internet services from citizens in Hague and the support we received from Council. The response in Hague from our initial discussions through to the campaign has always been extremely encouraging. As a result, Redbird has decided to proceed with construction of fibre internet service to the town. The economic growth and sustainability potential of Hague soon having one of the fastest high-capacity Broadband networks in the province is exciting.

Construction crews are mobilizing to start next week and potentially could be complete in 8 to 10 weeks. The Surveyors have already started their work.

Often during the construction Redbird has to excavate holes, and it may take a little bit of time, but Redbird will ensure that everything is tidied up after they are finished. Also, the crews may be in people's ways and they may unfortunately have to block traffic, so we appreciate everyone's patience.
